

CLAIMS

Claims 1 to 81 are canceled.

82. (currently amended) A method for absorbing irritants in the skin and delivering sulfur to skin comprising

Applying a composition, wherein the composition comprises water, xanthan gum, magnesium aluminum silicate, kaolin, silicon dioxide, at about 10% sodium sulfacetamide, sodium thiosulfate, glyceryl stearate, PEG-100 stearate, quillaia saponaria extract, benzyl alcohol and at about 5% sulfur;

Absorbing irritants from the skin with the composition; and

Delivering sulfur to the skin, wherein the skin comprises one or more selected from the group consisting of epidermis, dermis, and stratum corneum.

83. (previously presented) The method of claim 82 wherein the composition has a pH of about 6.5 to about 8.1.

84. (previously presented) The method of claim 82 wherein the composition has a pH of about 7.0 to about 8.1.

85. (previously presented) The method of claim 82 wherein the composition has a pH of about 7.7 to about 8.1.

86. (previously presented) The method of claim 82 wherein the composition has a pH of about 7.3 to about 7.7.

87. (previously presented) The method of claim 82 wherein the xanthan gum is present at about 0.30%.

88. (previously presented) The method of claim 82 wherein the magnesium aluminum silicate is present at about 1.50%.
89. (previously presented) The method of claim 82 wherein the silicon dioxide is present at about 5.00%.
90. (previously presented) The method of claim 82 wherein the water is present at about 40-50%.
91. (previously presented) The method of claim 82 wherein the water is present at about 41.76%.
92. (previously presented) The method of claim 82 wherein the water is present at about 46.76%.
93. (previously presented) The method of claim 82 wherein the irritants comprise one or more selected from the group consisting of sweat, sebum, moisture, epidermal metabolites, residue from cosmetics and residue from pharmaceuticals.
94. (currently amended) A composition comprising
- Water;
- Xanthan gum;
- Magnesium aluminum silicate;
- Kaolin;
- Silicon dioxide;
- At about 10% Sodium sulfacetamide;
- Sodium thiosulfate;

Glyceryl stearate;

PEG-100 Stearate;

Quillaia saponaria extract;

Benzyl alcohol; and

At about 5% Sulfur.

95. (previously presented) The composition of claim 94 has a pH of about 6.5 to about 8.1.
96. (previously presented) The composition of claim 94 has a pH of about 7.0 to about 8.1.
97. (previously presented) The composition of claim 94 has a pH of about 7.7 to about 8.1.
98. (previously presented) The composition of claim 94 has a pH of about 7.3 to about 7.7.
99. (previously presented) The composition of claim 94 wherein the kaolin is present at about 18.00%.
100. (previously presented) The composition of claim 94 wherein the xanthan gum is present at about 0.30%.
101. (previously presented) The composition of claim 94 wherein the magnesium aluminum silicate is present at about 1.50%.
102. (previously presented) The composition of claim 94 wherein the silicon dioxide is present at about 5.00%.

103. (previously presented) The composition of claim 94 wherein the water is present at about 40-50%.

104. (previously presented) The composition of claim 94 wherein the water is present at about 41.76%.

105. (previously presented) The composition of claim 94 wherein the water is present at about 46.76%.

106. (currently amended) A method for delivering sulfur to skin and absorbing irritants in the skin comprising:

Applying a composition, wherein the composition comprises water, xanthan gum, magnesium aluminum silicate, kaolin, silicon dioxide, at about 10% sodium sulfacetamide, sodium thiosulfate, glyceryl stearate, PEG-100 stearate, quillaia saponaria extract, benzyl alcohol and at about 5% sulfur;

Absorbing irritants from the skin with the composition wherein the irritants comprise one or more selected from the group consisting of sweat, sebum, moisture, epidermal metabolites, residue from cosmetics and residue from pharmaceuticals; and

Delivering sulfur to the skin, wherein the skin comprises one or more selected from the group consisting of epidermis, dermis and stratum corneum.
